

# AnMee Tech *Engineering Adhesives:* *Extensive range for wide applications*

## Anaerobics

High-performance, Fast-curing adhesives

### ■ Thread-locking adhesives

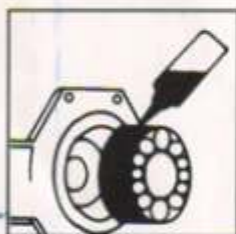

Designed to lock threaded fasteners and prevent loosening due to vibration and shock

| Grade No. | Application   |
|-----------|---|
| 312       | For locking of small screws   |
| 332       | General-purpose locking of screws and nuts up to M10                    |
| 352       | High - strength locking of nuts and bolts upto M14                      |
| 343       | For locking of large-size bolts against heavy shock                     |
| 350       | Penetrating can be applied after the fastener assembly has been torqued |

### ■ CO-axial bonding adhesives (retainers)

For bonding cylindrical parts such as bushes, ball bearings, collars, shafts, gears, cup plugs, oil seals and knobs.

| Grade No. | Application   |
|-----------|---|
| 432       | For retaining bearings in worn-out housings or shafts |
| 471       | High-strength retaining for bushes and gears          |
| 483       | For retaining dynamically bonded components           |
| 492       | For high-strength retaining                           |

### ■ Thread-sealing adhesives

For sealing of threaded parts to prevent self loosening, seizure due to corrosion and leakage through threads.

| Grade No. | Application                                     |
|-----------|---|
| 132/133   | For sealing hydraulic and pneumatic fittings    |
| 105       | For sealing pipes with large and coarse threads |

### ■ Gasketing

Sealing of flat-mating surfaces

| Grade No. | Application   |
|-----------|---|
| 205       | General Purpose, easy to disassemble, gasket eliminator                 |
| 223       | Low viscosity, easy-to-apply sealant for well-machined small components |
| 225       | High-viscosity paste-sealant for bigger-size components                 |

## Cyanoacrylates

Instant adhesives formulated for superior and reliable performance.

| Grade No. | Application   |
|-----------|---|
| 700       | Low viscosity, general-purpose for rubbers and plastics     |
| 701       | Fast curing, high strength for bonding difficult substances |
| 721 / 731 | Fast curing, high viscosity for gap-filling                 |
| 753       | Adhesive for metals. high strength, high impact             |
| 793       | High viscosity, high impact for metals, rubber and plastics |

## HOT-melt glue sticks and glue guns

Convenient and easy-to-use hot melt adhesives.

| Glue sticks Colours | Application   |
|---------------------|---|
| White / transparent | For anchoring and potting of components on a PCB                  |
| Yellow              | For costume jewellery, gift-packaging, binding and carton closing |

| Glue guns Grade No. | Application               |
|---------------------|---------------------------|
| W4 (40 watts)       | For different glue sticks |
| W 10 (60 WATTS)     |                           |

## RTV silicon sealants adhesives

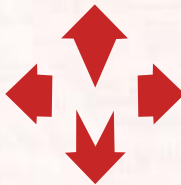

| Grade No. | Colour              | Type    |
|-----------|---------------------|---------|
| 912       | White / Transparent | Acetoxy |
| 920       | Black / Transparent | Neutral |
| 925       | White / Transparent | Neutral |
| 930       | White / Transparent | Neutral |

Speciality Anaerobic Adhesive Grades can be designed, as per the Customer's requirements. depending on the application. Please contact us for your special requirements.

## Made-to-order adhesives

The existing range of speciality adhesives is listed below. We also offer adhesives designed to suit specific applications as per your requirement.

- UV-curing adhesive
- Cyanoacrylates
  - High Strrength
  - Coloured
- Anaerobics
  - Oil Resistant
  - For Stanless Steel

## Manish Agencies

309, Shalin Complex, Opp, Vijaya Bank, Krishnabaugh Cross Road, Maninagar, Ahmedabad - 380 008 (Guj.) India.

Phone : 079 25466002 / 25450359
